WELCOME TO SMART CABINETRY

We are humbled and thank you in your decision to choose our cabinets.

This guide features our selection of cabinets and accessories, plus their specifications to help you decide on your kitchen and bath projects. In this book, you will also find our troubleshooting guide and installation tips to guide you and your clients to care for and enjoy our cabinets for many years to come.

We hope that working with Smart Cabinetry exceeds your expectations.
SMART CABINETRY

An acpi® brand
LEXINGTON
Polar White, Upper Cabinets
Harbor Gray, Base Cabinets
WHY SMART CABINETRY

15 YEARS +
Smart Cabinetry has grown since 2004 into a nationally recognized brand by our industry. We attribute this to our drive to make good quality products guided by our philosophy: Customer Focused. Budget Conscious. Rapid Delivery.

2016
Smart Cabinetry joins acpi, one of the largest kitchen and bath cabinet manufacturers in the USA. This partnership allows us to expand our reach to offer our products to more customers.

Smart Cabinetry has made progress due to our innate desire to ensure a better service to you, our customers.

Trust and hands-on approach are at the core of our management philosophy. We live by our values, have fun and take pride in what we do. Our values are to maintain a work environment where people enjoy coming to work, to serve and exceed customer expectations, while being results-oriented and profitable.

We also believe in our responsibility to be good citizens in the communities we serve. We do this by making contributions and opportunities available to those in need.

20 DAYS
We pride ourselves in our efficient production systems. The average lead time is 20 business days.

250,000 SQFT
Our recently expanded facility in New Paris, IN allows for more efficient material handling to facilitate on time production and delivery to our customers.
OUR GUIDING PRINCIPLES

INTEGRITY. The foundation for all that we do. Integrity includes honesty, decency, consistency, and courage.

DIALOGUE. We are open to diverse points of view and actively engage in thoughtful dialogue. We commit ourselves to broaden our understanding of our issues to better address the needs and concerns of our customers and each other.

TRANSPARENCY. We ensure that information is available, accessible and understandable.

SHARING. We share knowledge and technology to advance our understanding, improve our products and environment.

BENEFITS. We use sound and innovative manufacturing practices and thoughtful and effective stewardship to deliver high-quality products that are beneficial to our customers and the environment.

RESPECT. We respect the religious, cultural, and ethical concerns of people throughout the world. Our highest priority is the safety of our employees, the communities we operate in, our customers and consumers, and the environment we live in.

OWNERSHIP. We create clarity of direction, roles and accountability, build strong relationships with our customers and external partners, make wise decisions, steward our company resources, and take responsibility for achieving agreed-upon results.

FOSTER A GREAT PLACE TO WORK. We ensure diversity of people and thought, foster innovation, creativity and learning, practice inclusive teamwork, reward and recognize our people.

CUSTOMER FOCUSED. BUDGET CONSCIOUS. RAPID DELIVERY.
CERTIFICATIONS & MEMBERSHIPS

Smart Cabinetry strives to be the best, which is made possible by the synergistic relationship among our valued customers, our local communities, our operating environment, and our manufacturing facilities. We continue to engage in, use and development of environmentally friendly technologies and clean production.

Smart Cabinetry is nationally recognized by ANSI/KCMA to have passed a rigorous battery of tests that simulate many years of typical household use. Testing is performed by approved third party independent laboratories. Samples for testing are selected in an unannounced visit to our manufacturing plant.

To find more information KCMA, visit kcma.org

The Kitchen Cabinet Manufactures Association developed the Environmental Stewardship Program to encourage practices that benefit the environment. The voluntary program gives cabinet manufacturers a way to demonstrate their commitment to sustainability and helps to identify products that are better for you, your home, and the environment.

Membership with the Wood Products Manufacturers Association allow us to focus on what we do best; provide quality built cabinets at an affordable cost.

The U.S. Green Building Council (USGBC) is Smart Cabinetry’s source for up-to-date, information on the LEED rating systems.

Find more info about LEED at usgbc.org/leed

WOOD TYPES

The type of wood or material that you choose is as much important as the style of your cabinetry. Each wood type holds and absorbs finishes differently. Different material types also feature their unique grain and characteristics. More information for each type is available in the following pages.

FINISHES

The coatings applied to our cabinets consist of LOW VOC environmentally safe materials. All top coats and stain coatings used by Smart Cabinetry meet or exceed Green Guard Emission Standards. In addition to our environmental stewardship, our coatings have a high durability: resistance of stains, abrasion, chemical, impact, and scratch resistance are among our long list of advantages.

Smart Cabinetry’s coatings create less waste and use less energy which ultimately allow us to continue our mission to deliver above industry value at affordable prices. Naturally, however, your choice of wood species will have the most impact on the cabinet’s final appearance, because wood grain and natural characteristics will show through stain colors. Color stains will render the actual color of the cabinet, bring out the natural beauty of the wood, and amplify those inherent “character marks”.

Softer areas of the wood will accept more stain and often appear darker than other areas. Potential natural variances in color cannot be controlled even with the latest technology in diamond tooling and sanding in multiple stations through out our facility. Differing densities inherently create different effects regardless of the hours expended selecting only the finest hardwoods.

*A Finish Agreement (provided by dealer/distributor) needs to be signed by customer before finalizing any orders containing special finishes.
EDGE PROFILES

Our door styles offer 2 types of edge profiles. The type of edge profile that your chosen door comes in can have an impact on the overall feel of your space. A reverse edge profile, for example, allows for the opening of the cabinet or drawers without the need for the installation of door handles.

OVERLAY

Overlay refers to how much of the door and drawer fronts cover the cabinetry frame.

**STANDARD OVERLAY.** This overlay shows a 1” reveal on all sides.

**MODIFIED FULL OVERLAY.** A modified full overlay leaves a 1/4” reveal on the sides, while leaving a 1” reveal on the top and bottom to allow for countertop and trim.

**FULL OVERLAY.** This style of overlay leaves a 1/4” reveal on all sides and in between doors and drawers. This reveal emulates the visual style of a frameless cabinet.
MAPLE

CHARACTERISTICS

The maple wood used by Smart Cabinetry comes from the colder climates of upper Michigan and Pennsylvania. These supplies are manufactured within 25 miles of our plant and delivered daily assuring Smart Cabinetry customers the whitest of wood without developing any staining. Even though maple is quick growing, its grain is straight, fine-textured, and strong. Within the grain are variations in color that ranges from light to dark reddish brown as well as mineral streaks, swirls, and pitch flecks. Over the years, the interaction of sunlight with the oxygen in the wood will give your cabinetry a soft golden glow.

AVAILABLE FINISHES

Printed colors are for representation only. Order samples for accurate color matching.

Refer to page 95 for our disclaimer about our finishes.

- SHOWN: Pecan

5-piece drawer front upgrade available
Smart Cabinetry receives its red oak wood components and panel products from vendors within 25 miles of our plant and delivered daily. Red oak’s grain is quite dominant and varies from straight lines to arched or pointed patterns. Colors in the heartwood range from pink to green as well as from light to dark, whereas the sapwood of red oak is white to light brown. Like so many other woods, the color of red oak cabinetry deepens as the wood interacts with natural light. The wood is similar in general appearance to white oak, but with a slightly less pronounced figure due to the smaller rays.

Printed colors are for representation only. Order samples for accurate color matching.

FIBER BOARD

CHARACTERISTICS

Fiberboard is a blanket term used to identify both MDF (medium-density fiberboard) and HDF (high-density fiberboard) products, and is used throughout many components in Smart Cabinetry’s product offering. Being an engineered material, fiberboard offers excellent strength and rigidity. Compared to solid wood, fiberboard is less susceptible to growing and shrinking due to climate changes.

Smart Cabinetry’s Powdercoated, Thermofoil, and Thermofused doors incorporate a fiberboard core to ensure lasting beauty as well as functionality for many years to come.

AVAILABLE FINISHES

Printed colors are for representation only. Order samples for accurate color matching.

After you have made your selection, you are now ready to send in your order.

This section explains our online ordering system, which we encourage our customers to use, and a brief explanation on how our SKU naming system works.

Only registered dealers are able to use our convenient online ordering system.

Contact your Sales Representative for more information on how to become a registered Smart Cabinetry dealer.
As a Smart Cabinetry customer, you have access to the Online Ordering system. We encourage all our customers to utilize the Online Ordering System to ensure accuracy and speedier processing of your requested orders.

If you have any question regarding your customer account, please contact your Sales Representative.

### COPY ORDERS

Duplicate an order at the push of a button. Copy all of your order’s data into a new order where you can change anything you’d like. You can submit multiple orders at once too. Large project work can be entered in a matter of minutes!

| B30 | 7 | $359.00 | $ |
| B33 | 8 | $374.00 | $ |
| B36 | 9 | $382.00 | $ |
| B30 | 1 | $399.00 | $ |

### SEARCH FOR CABINET SKU'S

Our new SKU list has auto-completion, so finding the right part number has never been easier. The ordering system makes it a breeze to submit an order to us, which saves you and your customers time.

Orders will be locked and processed as soon as they are submitted.

Submitted orders cannot be copied using the Copy Orders function online.
1. From your account dashboard, go to Orders. Click New.
2. Enter your Purchase Order Number.
3. Select your Order Type: New or JCO.
4. Proceed to input your desired Door Styles, construction preferences, cabinet SKUs, and quantity desired.
5. Click Continue to enter Shipping information. Orders will be saved automatically. Select the appropriate boxes for special shipping services, if needed. Additional charges may apply if the proper shipping method is not selected. Make sure to include any additional instructions in the Notes section.
6. Click Continue to review your order.
7. Hit Submit to finalize and send your order to Smart Cabinetry.

CUSTOMER FOCUSED. BUDGET CONSCIOUS. RAPID DELIVERY.
Thank you for purchasing our cabinets!

We are glad that you chose Smart Cabinetry. We want to make sure you continue to enjoy your cabinets for years to come.

This section features our after purchase guides such as installation tips, troubleshooting common issues, how to do minor repairs, or how to file claims for additional support.

Find more support online at:

smartcabinetry.com under the “Support” tab
FREQUENTLY ASKED QUESTIONS

WHEN DOES MY LEAD TIME BEGIN?

Lead time begins after the 24 hour confirmation review and sign-off process.

CAN I GET AN ESTIMATE FOR MY SHIPPING COSTS?

Estimates are available on request. Please contact Shipping Department for a quote. Freight estimates are valid for thirty business days from date of email sent to customer. Freight estimates are calculated and quoted by the most economical mode of transport.

HOW DO I KNOW WHEN MY CABINETS WILL DELIVER?

For the actual date of delivery, please contact the shipping department 3-4 days prior to the projected ship week listed on your order confirmation.

HOW MANY CABINETS CAN SHIP ON ONE TRUCK LOAD?

250-300 cabinets or 3,000 cubes are standard for one truckload. (Subject to change according to SKU sizes)

WHAT ADDITIONAL SERVICES ARE AVAILABLE WITH DELIVERY?

Services like lift gate, driver assist, and so on may be available at extra cost. For a complete list of accessorical charges contact logistics@smartcabinetry.com

WHAT IF MY SHIPMENT IS DAMAGED?

Upon delivery notify the delivery driver of the damage and request that he/she make a note of the damage on the bill of lading. Sign the Bill of Lading, as proof of delivery; include identified damage noted on signed Bill of Lading. All damaged items need to be accepted by the customer. Do not reject damaged items.

Damage claims will need to be filed on Smart Claims Form prior to shipping replacements. To file a damage claim, please fill out claims form in its entirety, then fax to Smart Cabinetry @ 1 866-836-5747. Include your order number, buyer’s name, shipping address and a brief description of damage. Send pictures of damage along with the claims form. Upon receipt of the claim form, Smart Cabinetry will send a confirmation.

Smart Cabinetry cannot be held responsible for any labor costs accrued during the installation of products sold via any of its channels of distribution due to claim. This includes, but is not limited to, items that may be flawed or have become damaged in transit.

Notes: This policy does not cover freight damages or shortages due to shipping of product. Customer must receive product in accordance with Smart Cabinetry shipping and receiving policy, and may be required to submit information verifying the claim. These policies are set by our freight carriers, so failure to comply will result in loss of compensation for the customer.

*Production lead times are for standard new orders only. JCO and Claim orders are scheduled twice per week. JCO and Claim orders may close before 24 hour sign-offs to expedite production.
INSTALLATION TIPS

Do not store cabinets in a moist environment. Wood products, especially one piece cabinet doors, absorb excess moisture in the air and can expand. These minor changes in size due to improper storage are not covered by Smart Cabinetry’s limited 5 year warranty. Store cabinets in a dry and conditioned environment.

Ensure the floor is level before starting any installation. It will be necessary to locate any uneven areas and shim or scribe cabinets in order to make the installation plumb, true and square.

Start with wall cabinets and begin in a corner. Measure from the corner to the first stud, and mark the measurement on the inside of the cabinet to be installed. Repeat this process for each and every stud. Drill a pilot hole through the back of the cabinet 3/4” down from the top and 3/4” up from the bottom. Fasten the cabinet to the wall with wood screws. Do not fully tighten the screws until all wall cabinets are in place.

Properly attach all wall cabinets to a soffit. Affix to a permanent structure by running lag bolts through the top face frame into the "2 x" structure directly overhead.

If soffit does not exist, the cabinets must be attached to an adjoining cabinet which is affixed to a permanent interior structure. For end of run cabinets, install a tall end panel and attach to its frame establishing a “permanent” fixture which supports the cabinet.

When installing a blind cabinet, make sure the cabinet is pulled out from the wall the appropriate distance as called for in your kitchen plan. See page 26 for guidelines about blind cabinet pull distances.

Adjust cabinet doors easily with a Phillips screwdriver. Rotate the micro screw nearest the door to adjust side to side. Loosen middle screw, align door, and tighten the screw to adjust the door’s height. Finally, rotate the cam screw near the inside of the cabinet to adjust the depth of the door.

For a more in depth installation guide, visit our website: smartcabinetry.com/cabinetinstallation.php
A soft cotton cloth dampened with warm water is usually sufficient to clean your cabinets. If more thorough cleaning is required, use on the following cleaning solutions:

- A mixture of dishwashing liquid and warm water.
- A mild all-purpose cleaner. Make sure it does not contain ammonia, silicone, or acid.

Use the mildest cleaning solution that will successfully clean your cabinets. Stronger products may damage or discolor your cabinet finish and are not recommended. After cleaning, wipe all surfaces with a clean, damp cloth. Dry immediately using another soft, clean cloth.

**SPLATTERS AND SPILLS**
Clean spills and splatters immediately. Prolonged exposure to spills, including food, water, other liquids, oil, and grease splatters can cause permanent discoloration or damage to your cabinet’s finish.

**CLEANING PRODUCTS TO AVOID**
Avoid using the following products on your cabinets:

- Harsh chemicals including ammonia and bleach.
- Abrasive cleaning products such as tub and sink cleaners, scouring powder, scouring pads, or steel wool.
- Sponges or dish cloths. They may contain particles that could scratch your cabinets, or they may contain food and oil residue.
- Solvent-based or petroleum-based products such as mineral spirits, nail-polish removers or paint thinners.
- Silicone-based cleaning, waxing or polishing products.

**REGULAR DUSTING**
Use a clean, soft and lint-free cotton cloth for regular dusting. Packaged dusting sheets are not required or recommended. Do not use pre-moistened dusting sheets, and do not use aerosol products made for dusting.

**WAXING AND POLISHING**
Waxing is not required or recommended. Over time, waxing and polishing compounds may build up on the surface of your cabinets and cause a hazy, streaky or yellowed appearance.
The cabinetry you have selected has its own personality and character, as well as a richness and depth in its color and grain.

You may notice the variations in the grain and color of your cabinet if you have selected a natural or light finish.

Variations will be less apparent with darker stains. Your cabinets have been constructed from carefully selected quality hardwoods. Because imperfections are part of the natural beauty of hardwood, and not the result of the manufacturing of your cabinets, your warranty cannot cover differences in color, grain and other natural variations. Nor can it cover possible differences in color when adding new cabinetry to old.

We encourage you to enjoy the natural beauty of solid wood and appreciate those characteristics that give it personality.

CLEANING GLASS DOORS
Extra care is required when cleaning glass doors. Spray an ammonia-free glass cleaner on a clean, soft, lint-free cloth or paper towel. Do not spray cleaner directly on the glass. It could seep behind the window dividers and cause damage.

SCRATCHES, GOUGES, AND NICKS
A touch-up kit is available to hide surface damage. Contact the sales representative or distributor where you purchased your cabinetry to purchase the color-matched touch-up kit for your specific cabinets. Use the kit’s touch-up pen to hide minor blemishes. Use the kit’s tinted putty stick to fill deeper scratches, gouges or nicks. Detailed instructions are provided in each kit.

AVOID MOISTURE DAMAGE
Avoid draping damp clothes or dish towels over cabinet doors. This moisture can cause permanent damage, such as peeling and discoloration, to the cabinet’s finish.

AVOID HEAT DAMAGE
The heat generated when using an oven’s self-cleaning feature is much greater than during normal use. This heat can damage nearby cabinetry. Although this is a rare occurrence, you can minimize the risk of heat damage by removing cabinet doors and drawers nearest the oven before using its self-cleaning feature or by installing heat shields.

AVOID LIGHT DAMAGE
Exposure to direct sunlight tends to darken the color of natural wood products. Sunlight can also fade painted wood surfaces. You should consider draperies or blinds to shield your cabinets from direct sunlight.

Additional information about your cabinets can be found at smartcabinetry.com/cabinetcare.php.
MINOR REPAIRS

You may encounter some unavoidable situations that create minor problems with your cabinetry. Before calling your dealer/installer for help, consider the following:

Minor scratches or dents in your cabinetry can be treated with a touch up kit. For major damage like severe scratching, broken doors or drawers, paint spills, etc., call your dealer for help or replacement.

If over time screws become loose on hinges, you can achieve a temporary fix by gluing a small diameter dowel rod into the hole using a high quality wood glue. Cut the dowel rod flush with the top of the screw hole and place into the hole. Let the glue dry and then replace the screw. Do not over tighten, or you will risk stripping it out again.

Minor door alignment can be corrected by adjusting the hinges. Generally, when you open the cabinet door, you will find the side-to-side adjustment slot on the door part of the hinge and the up and down adjustment on the frame portion of the hinge. Simply tighten / loosen these screws to adjust the cabinet door.

Minor roughness in end grain can be corrected with “light weight sanding paper” and top coat. If concerned please call dealer.

In most cases your cabinetry is protected by our five year guarantee from the hardware manufacturer. For hinges and hardware that do not work properly, contact your dealer for assistance.

When adding additional cabinetry in the same room at a later date, consider the following: To help minimize the color differences between any old and new units: Place the new cabinetry on a different wall, so any color difference won’t be as noticeable. Replace existing trim and molding with darker/lighter wood to give the old and new cabinets a unified look. Experiment with multiple finishes in the same wood species for a new look.
Some problems that may arise during installation can be remedied with the following troubleshooting table.

<table>
<thead>
<tr>
<th>PROBLEM</th>

</table>

Important: It is not advisable to install cabinets wider than 36 inches or deeper than 12 inches on a wall independently. If essential to one’s kitchen, the installer of the kitchen must secure the cabinet to a permanent structure, i.e. interior wall.

Important: Structural modification of a wall cabinet can significantly weaken the cabinet. For this reason modifications to Smart Cabinetry are not recommended, such as cutting the back to clear wall obstructions. If an obstruction exists, we suggest you first try to use cabinet(s) that do not require modifications. If modification is required, the warranty of the cabinet is void and it is the responsibility of the installer to take appropriate steps to compensate for any loss of strength or support due to the modification.

Soffit exists: Install permanently to a soffit by running four #10 lag bolts 3” in length through the top face frame into the “2x” structure (x4, x6, x8 or larger and a minimum) directly to the overhead structure or ceiling joist.

Soffit doesn’t exist: The cabinets must attach to an adjoining cabinet which is affixed to wall or permanent interior structure. If it is at the end of a cabinet run install a tall end panel (TEP) and attach to its frame establishing a “permanent” fixture supporting the cabinet permanently attached to the TEP which is permanently attached to the floor.

Failure to follow these instructions will void all warranties. The result could be the cabinet falling off the wall which becomes a liability not warranted by Smart Cabinetry.
Damage and/or product shortage: Claims are valid when proper documents and documentation submitted and signed by the customer and the transportation company. Documents include Smart Claims Form, Signed BOL, and photographs of damage.

MISSING ITEMS CLAIM:
Must be made at time of delivery and documented on the bill of lading. Claims can then be made via fax to 1-866-836-5747. Include Smart Claims Form, a copy of the signed BOL (proof of delivery), and notation of missing item.

DAMAGE CLAIMS:
Must be made within 24 HOURS OF PRODUCT DELIVERY and documented on the bill of lading (BOL) in addition to a properly filled out Smart Claims Form. Claims must be submitted via fax to 1-866-836-5747.

Pictures showing damage are required when submitting request for warranty / replacement of cabinets.

CONCEALED DAMAGE CLAIMS:
Claims can be made up to 30 days after receipt of order. Signed BOL’s (Proof of Delivery), Smart Claim Form and pictures are necessary to process ones claim. Concealed Damage Claims are defined as requests made greater than 24 hours after original delivery date.

Items claimed as “damage” are documented claims made within 24 hours of receipt of goods. Concealed Damage Claims costs are shared “proportionately” between our organizations. Approved concealed damage claim value is no more or less than 50%. Concealed damages are a 50/50 split on replacement.

Return Shipment is at customers expense.
DISCLAIMER ON FINISHES

Painted finish Agreement (provided by dealer/distributor) to be signed by customer before finalizing any orders containing special finishes.

All wood products naturally expand and contract with changes in temperature and humidity. This natural movement may cause painted finishes to develop separation lines or breaks where any two pieces of wood join together. These breaks may become more noticeable as time passes. Like other finishes, paint is also susceptible to changes in color due to exposure to natural light, extreme heat, smoke, and abrasive cleaners. Areas with additional contact with water or fluids onto doors or drawer fronts could break-down the finish with overexposure.

Therefore, for the reasons stated above, the warranty of Smart Cabinetry’s painted product (special finishes), STRUCTURALLY, is one year from date of purchase. However, there is no warranty and there is no implied period to warranty noticeable imperfections as discussed above.

DISCLAIMER FOR THERMOFOIL DOORS

Thermofoil Doors (Brentwood, Northport, Denver) should note heat shields are required for installations next to heat sources; stoves, ovens, heaters, etc. Heat shields on page 78.

DISCLAIMER FOR MAPLE AND OAK SLAB DOORS

Slab Doors (Rockport, Freeport, Chateau, Edgewood, Nantucket) depending on the regional environmental climate change can decrease or increase in the dryness or humidity. This can cause doors to shrink or swell in size in a very short period of time. Cabinets should not be delivered and stored into areas of drywall mudding, painting, or open air environments. Smart Cabinetry is not responsible or liable for cabinet doors shrinking or swelling after shipping.
LIMITED 5 YEAR WARRANTY

Five Year Limited Warranty on Cabinets, excluding special finishes. Smart LLC, d/b/a Smart Cabinetry warrants to original purchaser for a period of five years from the original date of purchase that all components of Smart Cabinetry shall be free from defects in material and workmanship under normal use. This warranty is only applicable to products used in standard North American residential applications and is not transferable.

Should defects in material or workmanship exist during the applicable warranty period in any Smart LLC product, Smart Cabinetry will elect at its discretion to either repair or replace the defective material or component free of charge. This warranty covers only parts and materials of the products supplied by Smart Cabinetry. Not covered under this warranty are counter tops, appliances, plumbing fixtures, etc. or the costs, including labor, to remove and reinstall materials and related components such as fittings, appliances, etc. This warranty shall become void if the cabinets are in any way modified, improperly installed or damaged prior to or during the installation. This limited warranty applies only in the case of the standard residential application in the United States, and is void for all other applications. Furthermore, this warranty will not apply to cabinets damaged by misuse, neglect, abuse, acts of God, exposure to extreme temperatures, the effects of normal wear and tear or exposure to moisture including, but not limited to, excessive or continued exposure to moisture as a result of leakage, improper plumbing, flooding, etc.

Hardwoods vary in color, characteristics, and may exhibit subtle changes as they age. Sunlight, smoke, household cleaners and other environmental conditions may also affect the color match over time. These variations are considered the nature of the material in relation to their environmental exposure and are not covered under this warranty.

Hardwoods will expand and contract physically when environmental changes occur in the normal setting of one’s kitchen. Changes in temperature, humidity, or prolonged moisture will cause normal “movement” in hardwood products. Hairline cracks or “separation” may appear consequently becoming visible over joint areas. Painted face frames, doors and other painted products (doors) may develop joint separation and visible cracks. Visual variations such as these are considered normal and customary in our industry. Characteristics developing from the materials used constructing Smart Cabinetry relative to its environment is not covered under Smart LLC 5 year limited warranty.

Smart cabinetry’s five year limited warranty shall become void from the improper use of household chemicals. Alkaline, acidic and ammonia based detergents and cleaners, as well as vinegar and strong solvent based cleaners, and excess water exposure severely affect the finish of a Smart cabinet. This also includes mineral spirits, paint thinner or any other harsh cleaning chemicals including citrus and citrus based cleaners or any abrasive cleaning products.

Smart cabinetry reserves the right to alter designs, specifications and materials, and will periodically do so, as conditions require and improvements are developed, without obligation to make similar changes to products previously manufactured. The repair(s) or replacement(s) are contingent upon the current product offerings of styles and construction options within the Smart Cabinetry Product Line at the time of the warranty claim. If a warranty claim is filed after a product has become obsolete, or has undergone design, specification or material changes, we reserve the right to honor the warranty in one of the following manners:

1. To replace the affected component with a new component of the same style.
2. OR any affected component to achieve a uniform appearance with a comparable product style.
LIMITED 5 YEAR WARRANTY

If components are replaced, Smart Cabinetry cannot guarantee the finish of these replacements will exactly match the finish and appearance of the components in the residential application due to the changes that occur during hardwoods natural aging process. Imperfections are part of its inherent natural beauty. Wood varies in color and characteristics that exhibit subtle changes as it ages. For example, white-painted face frames will eventually have visible seam lines at the joint areas, and individual cabinet wood species will darken or lighten with time. Imperfections are not the result of manufacturing ones cabinets, Smart Cabinetry’s Limited 5 Year Warranty will not cover differences in color, grain and natural variations including but not limited to those “character” imperfections indigenous to the species of hardwoods used by Smart Cabinetry nor does it cover possible differences in color when adding new cabinetry to old.

Smart Cabinetry does not warrant the installation of “stand alone” or independent cabinets in widths greater than thirty-six inches and depths greater than 12” inches. All cabinets regardless of design dimension or shape must be affixed to “studs”, permanently fastened to interior wall, floor or ceiling joists attached to permanent structures i.e. interior partition wall or floor. IMPORTANT: Structural modification of a wall cabinet can significantly weaken the cabinet. For this reason modifications are not recommended, if modification is required, the warranty of the cabinet is void and it is the responsibility of the installer to take appropriate steps to compensate for any loss of strength or support due to the modification.

*** SEE INSTALLATION INSTRUCTIONS
THIS WARRANTY IS THE EXCLUSIVE WARRANTY OF SMART CABINETRY AND IS IN LIEU OF AND SMART CABINETRY DISCLAIMS ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

This warranty applies only to products manufactured or supplied by Smart Cabinetry. Any interpretation herein other than written is unwarranted.

This warranty applies only to products used in residential applications within the United States and is not transferable to subsequent owners. This warranty supersedes all previous warranties from date of issuance. This Warranty constitutes the exclusive remedy against Smart Cabinetry for alleged defects in materials and workmanship.

This warranty gives you specific legal rights and you may have other rights, which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

To obtain replacement(s) under Smart Cabinetry’s Five Year Limited warranty, first contact your authorized Smart Cabinetry dealer or distributor, who will arrange for inspection of the cabinet. A dated sales receipt as proof of purchase is required to obtain benefits from this warranty.

SMART CABINETRY’S SOCIAL RESPONSIBILITY

Smart Cabinetry® is committed just as much to the environment as we are to our customers. To leave the lightest carbon footprint on our environment is something every employee at Smart strives for. Protecting the environment is not just green, it’s Smart. We continually make every effort to improve our manufacturing processes and products to ensure environmental responsibility and a continual reduction of our carbon footprint. Many of the components included in our cabinets contribute to various LEED® credits including but not limited to recycled content, regional materials, rapidly renewable materials, and low-emitting materials.

Aside from the practical storage and aesthetic appeal, Smart Cabinetry® cabinets are designed to be environmentally friendly and reduce the negative impact on our environment. Far too many benefits to building green exist today including the cost savings from reduced energy, water and waste disposal costs; and a healthier consumer environment from cleaner indoor air.

Find a list of LEED® credits that you are eligible for when you purchase Smart Cabinetry at:
